

A black and white photograph of two sheep in the foreground and a crowd of people in the background at a fairground. The sheep are standing in a pen, and the people are standing behind a metal fence. The text is overlaid on the image.

The 10th Annual Montana Ewe Sale

&

The 98th Annual Montana Ram Sale

PRESENTED BY THE

MONTANA WOOL GROWERS ASSOCIATION

SEPTEMBER 13-14, 2023

EASTERN MT FAIRGROUNDS, MILES CITY, MT

Hello!

The Montana Wool Growers Association is pleased to announce the 10th Annual Montana Ewe Sale and 98th Annual Montana Ram Sale in Miles City, MT! The collection of 285 rams and 1,280 ewes offered for sale this year is a testament to the dedication of our consignors. MWGA is immensely proud to count these hard-working families among our membership! We know you will find great value in the offerings.

The Montana Ram Sale has emerged as a national leader in the industry on providing scrapie codon, NSIP data, production records, ribeye scans, and micron results so that you can have confidence in what you're bidding on. There are several different breeds available from consignors around the state. We encourage you to take your time as you look through the pens of rams and ewes. The consignors will be around to answer your questions and help you find sheep to fit your flock goals.

All rams and ewes on site in Miles City have been tipped up and inspected by our sale vet. By doing this, we like to ensure you are going home with a sound, healthy ram or ewe. Buyers are responsible for transportation arrangements. Please plan ahead if you hope to buy sheep and are going to need to find them a ride.

Again, we thank you for taking the time out of your busy schedule to view and attend our sale. This sale is made possible by the support from our MWGA membership, local Miles City businesses, consignors, volunteers, the Lewistown Livestock team, Frontier Productions, MWGA committees, and YOU, the buyers. We owe the success of this sale to the consignors who bring their best sheep to town, and the buyers who return year after year.

Don't forget to join us for all the fun ahead of the sales, including the sheep and wool judging contests on Wednesday the 13 starting at 9am (lunch included), the Ewe Sale Social at 5pm ahead of the Ewe Sale, and the Ram Sale Lunch beginning at 11 am on September 14th!

Enjoy the Sales,

Christian Posbergh
Ram Sale Manager
(406) 823-9615

&

Cheryl Scholdt
Ewe Sale Manager
(406) 945-0404

THANK YOU MONTANA!

Montana Wool Grower Districts (APPROVED DECEMBER 2012)

THANK YOU SPONSORS!

Sale sponsorship is an integral part of the success of these sales each year. We thank our sponsors, past and present, for helping continue the legacy of the Montana Ram Sale, and now the Montana Ewe Sale.

Thank you for your contributions to this sale. We look forward to spending time in the Miles City community each year. The town of Miles City is a second home to many of these consignors, who have been making this fall trip to bring their consignment to Miles City for decades.

Thank you to the Miles City community for welcoming MWGA and 'sheep week' each year.

In addition to sponsors, we'd like to thank the countless volunteers that show up each year to contribute to these sales! From help at sifting, load-out, serving meals, setting up and tearing down the sale barns, and more-it takes a big sheep family to put this on!

THANK YOU ALL!

RAM AND EWE SALE TERMS

2023 Montana Ram and Ewe Sale Terms

1. Any changes to the sale book are provided on a supplement sheet sale day and will be announced on the auction block.
2. In bidding on pens of rams or ewes, bids will be based on the price per head - not the pen as a whole. The auctioneer will settle misunderstandings or disputes as to bids per his discretion.
3. All sheep on the grounds are held at the seller's risk until sold. Ownership changes when the sheep are sold in the ring. Sheep are held at the buyer's risk after the time of sale in the ring. The seller will ensure the sold animals are fed and watered until loading for transport. Load out will be no later than 10AM on the day following the ram sale.
4. Sale is being managed by Lewistown Livestock, Inc. Terms of the sale are cash or check, day of auction. Checks shall be made payable to Lewistown Livestock, Inc. Absentee buyers and internet buyers: payment must be mailed to Lewistown Livestock, PO Box 1190/83 Stockyard Lane, Lewistown, MT 59457, by the close of the next business day. Payment methods accepted are cash, check, ACH, or wire transfer. Buyer is responsible for any fees associated with wire transfer, postage, etc. These payment terms also apply to internet bidders registering with Frontier Live Sale. **CREDIT CARDS ARE NOT ACCEPTED.**
5. Absentee/Phone bidders must register with Lewistown Livestock 24 hours in advance to be approved to bid. Office: 406-535-3535. Kyle Shobe: 406-366-0472. Internet bidders may register at any time prior to auction with Frontier Live Sale.
6. Sheep will not be released for shipment prior to the end of the auction without written order from the Sale Manager.
7. Certificates of Veterinary Inspection will be provided by the sale veterinarian, required for interstate transport and Federal Law. If additional health certificates, tests, or documentation is required for transport, it shall be at the buyer's request and expense. The buyer must check the scrapie tag and paint brand for accuracy upon loading of the animal for transport and report discrepancies immediately.

10TH ANNUAL MONTANA EWE SALE

Wednesday, September 13, 2023 • 6PM

Agri-Sports Building • Eastern Montana Fairgrounds • Miles City, MT

The 10th Annual Montana Ewe Sale is set for Wednesday, September 13th, at 6:00 pm sharp. Ewes will sell at the Eastern Montana Fairgrounds in Miles City, and this year features 1,280 head of Montana raised yearlings and ewe lambs. The first 480 head will be offered and sold on-site at the Agri-Sports Building. Another 800 head will be available off-site for country delivery.

To kick off Ewe Sale Day, Montana State University Extension will be hosting a sheep judging contest. Sheep and Wool Judging Contest starting at 9am. The live animal contest will start at 9am and consist of 8 live animal classes, 2 reasons classes for the youth and a written exam for adults. There will be a free lamb braut lunch before the wool judging gets underway at 1:30pm with 4 judging classes and 1 set of oral reasons. There will be 4 divisions: 1. Junior (<14 years old) 2. Senior (>14 years old) 3. Collegiate and 4. Adult. Cost to register is \$5 and check-in will take place at 8am on Wednesday.

There will be plenty of time to look through the ewe and ram offering on Wednesday. The Ewe Sale social will begin at 5pm, with snacks and a cash bar available. Lewistown Livestock Inc will be handling the sale management this year, so be sure to get a bidders number from their table ahead of the sale. The Ewe Sale starts promptly at 6pm. First to sell will be a donation ewe, donated by John and Betty Sampsel of Hughes Newford Co. of Stanford, MT. A variety of wool and meat-breed ewes will be offered, on-site and off-site.

Ewes offered have a reputation for quality, so you can feel confident buying your ewes at this sale. The on-site ewes will be individually inspected by our sale veterinarian for general health, clear eyes, sound mouth, and udders. The ewes offered have been treated for keds at home. Any ewe not passing inspection will be screened out and will not sell—we want buyers to take home ewes that are functional and ready to go! The on-site ewes are available for viewing after 3pm on Tuesday and all-day Wednesday!

Many breeds will be offered, from 20 different consignors. Michelle Hersrud from Rapelje offers up 10 Targhee yearlings that are either twins or triplets. She has used Hughes Newford Co rams and maintains a good wool clip year after year. Garrett and Katie Harrington out of Broadus are a young couple raising Targhees that are functional and productive. Garrett is the 3rd generation in his family to raise sheep in SE Montana. Wynn & Jeff Tauck are no strangers to raising sheep either, Jeff is a 4th generation producer and has spent a lifetime raising Targhees and emphasizes fine, high yielding wool in their operation located north of Hammond. Prairie Elk cracks out for their first ewe sale in Miles City with 60 spring born Targhee lambs. They have been using bucks from Cord Bieber and have a very rigorous flock health program in place at the colony located out of Wolf Point. Duane and Patsy White from Circle have 200 head of fancy Targhee/

Rambouillet yearlings to offer. Their breeding program is based on ewes purchased from John Killen and ewes from this sale over the years. Their bucks have also come from the Miles City sale. They have sold most of their cows and are all in with their fine woolled sheep.

Featured this year for the first time ever Hollenbeck Land and Livestock will bring 30 head of Katahdin/Dorper fall ewe lambs. These lambs were born in the fall of 2022 and are ready for breeding this year. If you live in an area that has a shortage of sheep shearers or need some ewes for weed control or the growing ethnic markets then look no further.

Suffolk and Suffolk/Hampshire ewe lambs will be offered in pens of five. All whiteface ewes are about a year-and-a-half old, born in the spring of 2022, with the exception of Garrett & Katie Harringtons and Prairie Elk's lots of ewe lambs. Check the consignor listings on the following pages for details!

The off-site lots will be offered by Lehfeltd Rambouillets (Lavina), Blue Bell Sheep (Molt), Duane & Patsy White (Circle, MT) and Helle Rambouillet (Dillon).

Ben Lehfeltd from Lehfeltd Rambouillets will sell one lot of 100 head. The 100 head lots will be offered in groups of 50 head—Lots A and B. Successful bidders will have the option of taking one or both lots at that price before bidding is reopened on the remaining ewes.

Helle Rambouillet offers up 300 Rambouillet yearling ewes for your consideration. We will offer these yearlings in groups of 75 head—Lots A, B, C and D. Successful bidders will have the option of taking one or all lots at that price before bidding is reopened on the remaining yearlings.

Blue Bell Sheep Co is offering 200 head off-site, offered in groups of 50 head. Duane and Patsy White are offering 200 head, again in groups of 50 head. The 100 head lots will be offered in groups of 50 head—Lots A and B. Here's a great opportunity to partner with another sheep producer in your area and increase your flock numbers!

Buyers not able to attend the sale in person need to register to bid online. Information can be found online at mtnsheep.org (or check page 4 for all the details!). Online buyers should register 2 days in advance of the sale and preferably use a computer with high-speed internet on sale day to provide the best bidding experience. Phone bidding is also available. We hope to see you there!

PURCHASED EWES MAY BE LOADED OUT ON WEDNESDAY EVENING, THURSDAY MORNING BEFORE 11AM, OR AFTER THE RAM SALE IS COMPLETE, OR FRIDAY MORNING, NO LATER THAN 10 AM.

Please see SALE TERMS ON PAGE 8.

10TH ANNUAL MONTANA EWE SALE

DONATION EWE

Hughes Newford Co. - 1 Targhee Yearling - Stanford, MT

Funds raised will be used to offer scholarship(s) to young producers attending leadership and other industry events.

LOT 301

Montana Sheep Co - 10 Targhee Yearlings - Ft Shaw, MT

Montana Sheep Company – Roeder Family - We expect our ewes to be good mothers the first time and every time. Consigned are 10 Targhee ewes from a B. ovis free flock with MSC, Green, McRae, Innes, and Ortmann genetics. Ewe flock wool clip averages 21.5 Expect a 175% drop. Ewes will milk well with good udder construction. No eye problems. NSIP, wool, and ultrasound data available.

Raised with minimal inputs and guard dogs. Herded and grazed on knapweed this summer. Back poured and first vaccinations (Campylobacter, and Chlamydia) for breeding. Shorn March 28th, these ewes are thick bodied and structurally correct.

LOT 302

Sampsel Livestock - 10 Targhee Yearlings - Stanford, MT

We are back for our third-year consigning to the Montana Ewe Sale. The yearling ewes we have brought this year are commercial ewes that come from sires of Tunby, Hughes Newford, and some of our own range raised rams that we are excited to see growing up into very strong herd sires. Our ewe clip averaged 20.2 micron and had some of the best staple length that we have seen to date. Core test from 2023 ewe clip was 20.3 micron. Consistently we have had a 180% percent drop rate at lambing. All ewes are run through a barn for lambing and herded with guard dogs on native range and forage as well as leafy spurge. We look forward to discussing with anyone that has questions. Jeff (406)366-2568 or Dawnita (406)799-2379

LOT 303

Bieber Land, LLC - 10 Targhee Yearlings - Brockway, MT

Bieber Land is consigning sixty head of range ready yearling commercial Targhee ewes to the Tenth Annual Montana Ewe Sale. The dams of these yearlings have been shed lambed and selected for mothering ability as well as udder soundness and conformation. Ewes are retained for their ability to raise their lambs with no assistance while staying in good condition. The sires are all purebred Targhee rams with NSIP selected for high growth traits and high fleece traits. The rolling five-year core average for the flock is 20.5 micron. The ewes and lambs are run on Eastern Montana range after lambing and the lambs are weaned on grass. These yearling ewes were kept based upon conformation, build and their performance comparative to their birth type.

LOT 304

Hughes Newford Co - 10 Targhee Yearlings - Standford, MT

HUGHES NEWFORD will again bring 10 top commercial Targhee yearling ewes. We pay close attention to our maternal traits. These yearling ewes were weaned off their mother's milk and native range. They were wintered on alfalfa grass hay. They have been out on grass all summer and are ready to breed this fall. We will post wool microns and birth type this fall.

LOT 305

Rita Wemmer - 10 Targhee Yearlings - Miles City, MT

We are pleased to be offering this set of yearling ewes, started many years ago by Gerome. The flock was built up over a 45 year span and will continue to grow. Our Targhee rams have been purchased almost exclusively from the Montana Ram Sale. Rams from Lawrence Capra, Skull Creek Targhee and the latest purchases from McRae Brothers and Bieber Land LLC.

The sheep have a history of wool in the 62-64's and a 130-150% lamb crop, depending on annual conditions. We are continuing with the breeding program developed by Gerome those many years ago. We are offering these yearling ewes from the heart of our replacement ewes. We hope their bloodlines will do for your herd as they have done for ours over the years.

10TH ANNUAL MONTANA EWE SALE

LOT 306

Michelle Hersrud - 10 Targhee Yearlings - Miles City, MT

I have a flock of ewes that are purebred commercial Targhees. I use Hughes Newford bucks and have for the last 5 years. I breed for milk and wool. My wool grades at 21.8 micron. I lamb starting March 1 and sell the majority of my lambs in the beginning of June. We sell early to avoid coyote loss. Even selling in June our weaning weights are 80# and up.

LOT 307

Montana Ag Experiment Station - 10 Targhee/Rambouillet Yearlings - Bozeman, MT

The Montana Ag Experiment Station yearling ewe consignments are a Targhee/Rambouillet cross from sires sourced at the Montana Ram Sale for generations. These will be low input, moderate framed older style commercial, finewool ewes bred for the drier, rocky conditions at MAES Red Bluff. Our mature ewes will average around 130 pounds at turnout to summer range, shear a 20.8 micron clip and drop around 140% lamb crop. They are shed lambed and herded with guard dogs in the rough Bear Trap area north of Ennis. Ewes are wintered on minimal inputs and expected to forage.

LOT 308

Jones Ranch - 10 Rambouillet Yearlings - Conrad, MT

With a ranch history of 133 years of breeding, along with vigor, range raised, fed and bred here in Montana we offer 30 yearling ewes. We strive for always improving microns surpassing the expected. We also are focused on improving and perfecting weight gains, ribeye size and range hardiness, fertility, and milk production. Our goal is all about breeding quality. We focus on the whole picture not just one or two attributes. This is a really nice set of yearling ewes with micron range from 16-20.

LOT 309

Garrett & Katie Harrington - 10 Targhee Yearlings - Hammond, MT

Garrett & Katie Harrington's Targhee ewes originated from Dan and Carolyn Harrington's (my grandparents) Targhee ewes. This bunch of yearling ewes and ewe lambs are sired by Targhee rams from Mike Capra rams, Ortmann rams, and Tauck rams. Their wool has been averaging 20.5-21 micron. Our goal is to try to keep a smaller frame, open face ewe with longer & finer wool. Raised on the Powder River near Broadus, MT they feed mostly on river bottom ground and irrigated hayfields. Our herd has always been shed lambed and all replacement ewe lambs are individually selected & marked in the lambing jugs to be sorted again in the fall and after shearing!

LOT 310

Lehfeldt Rambouillets - 10 Rambouillet Yearlings - Lavina, MT

We are a Fifth-Generation, Polled, Registered Rambouillet sheep ranch located in Lavina, Montana.

Shed lamb 2300 commercial ewes and 170 registered ewes in April with over 160% lamb crop
NSIP and EBVs used in selection process for lambing rate, wool quality, and carcass quality for over the past 15 years.
Ewes/lambs herded with livestock protection dogs on grass and leafy spurge during summer months
All ewes have been herded in large bands on native grassland over the summer.

10TH ANNUAL MONTANA EWE SALE

LOT 311

Rita Wemmer - 10 Targhee Yearlings - Miles City, MT

We are pleased to be offering this set of yearling ewes, started many years ago by Gerome. The flock was built up over a 45 year span and will continue to grow. Our Targhee rams have been purchased almost exclusively from the Montana Ram Sale. Rams from Lawrence Capra, Skull Creek Targhee and the latest purchases from McRae Brothers and Bieber Land LLC. The sheep have a history of wool in the 62-64's and a 130-150% lamb crop, depending on annual conditions. We are continuing with the breeding program developed by Gerome those many years ago. We are offering these yearling ewes from the heart of our replacement ewes. We hope their bloodlines will do for your herd as they have done for ours over the years.

LOT 312

Bieber Land, LLC - 10 Targhee Yearlings - Brockway, MT

Bieber Land is consigning sixty head of range ready yearling commercial Targhee ewes to the Tenth Annual Montana Ewe Sale. The dams of these yearlings have been shed lambed and selected for mothering ability as well as udder soundness and conformation. Ewes are retained for their ability to raise their lambs with no assistance while staying in good condition. The sires are all purebred Targhee rams with NSIP selected for high growth traits and high fleece traits. The rolling five-year core average for the flock is 20.5 micron. The ewes and lambs are run on Eastern Montana range after lambing and the lambs are weaned on grass. These yearling ewes were kept based upon conformation, build and their performance comparative to their birth type.

LOT 313

Montana Ag Experiment Station - 10 Targhee/Rambouillet Yearlings - Bozeman, MT

The Montana Ag Experiment Station yearling ewe consignments are a Targhee/Rambouillet cross from sires sourced at the Montana Ram Sale for generations. These will be low input, moderate framed older style commercial, finewool ewes bred for the drier, rocky conditions at MAES Red Bluff. Our mature ewes will average around 130 pounds at turnout to summer range, shear a 20.8 micron clip and drop around 140% lamb crop. They are shed lambed and herded with guard dogs in the rough Bear Trap area north of Ennis. Ewes are wintered on minimal inputs and expected to forage.

LOT 314

Hollenbeck Land & Livestock - 10 Katahdin/Dorper Fall Lambs - Molt, MT

These Dorper/Katahdins were born last summer/fall. They have run with big bands of sheep all summer that have both been herded and with electric fence. These are a nice set of small framed hair sheep that will fit in an existing flock or a great starter flock. Hair sheep are in high demand, and a nice set of uniform ewes are hard to come by, don't miss out on this emerging market.

LOT 315

Garrett & Katie Harrington - 10 Targhee Lambs - Hammond, MT

Garrett & Katie Harrington's Targhee ewes originated from Dan and Carolyn Harrington's (my grandparents) Targhee ewes. This bunch of yearling ewes and ewe lambs are sired by Targhee rams from Mike Capra rams, Ortmann rams, and Tauck rams. Their wool has been averaging 20.5-21 micron. Our goal is to try to keep a smaller frame, open face ewe with longer & finer wool. Raised on the Powder River near Broadus, MT they feed mostly on river bottom ground and irrigated hayfields. Our herd has always been shed lambed and all replacement ewe lambs are individually selected & marked in the lambing jugs to be sorted again in the fall and after shearing!

10TH ANNUAL MONTANA EWE SALE

LOT 316

Prairie Elk - 10 Targhee Lambs - Wolf Point, MT

These Ewe lambs were born in April. They are shed lambed, we average around 200% drop and manage for production. Ewe lambs are selected based on confirmation and mothering ability. The flock comes primarily from foundation of Skull Creek Targhees. Lambs have great feet and are thoroughly Vet checked. Herd has never had sheep ticks in 15 years. They have been Intensively grazed using electric fence. Our wool clip consistently runs 21 to 22 micron.

LOT 317

Prairie Elk - 10 Targhee Lambs - Wolf Point, MT

These Ewe lambs were born in April. They are shed lambed, we average around 200% drop and manage for production. Ewe lambs are selected based on confirmation and mothering ability. The flock comes primarily from foundation of Skull Creek Targhees. Lambs have great feet and are thoroughly Vet checked. Herd has never had sheep ticks in 15 years. They have been Intensively grazed using electric fence. Our wool clip consistently runs 21 to 22 micron.

LOT 318

Heart Lazy P - 5 Suffolk Lambs - Miles City, MT

For your consideration 5 head of Suffolk ewe lambs with 24 years of genetics backing them. We strive to produce stock with a moderate frame, thick made, structurally sound, feed efficient with strong maternal instinct. Born the month of February, twin or triplet and will be at least QR. Several have brothers consigned to MT Ram Sale. I do not push my ewe lambs to grow fast but rather slow. They have been on pasture, hay with minimal grain, up to date on worming and ready to breed this fall.

LOT 319

Heart Lazy P - 5 Suffolk/Hamp Lambs - Miles City, MT

For your consideration 5 head of Suffolk/Hamp X ewe lambs with 24 years of genetics backing them. We strive to produce stock with a moderate frame, thick made, structurally sound, feed efficient with strong maternal instinct. Born the month of February, twin or triplet and will be at least QR. Several have brothers consigned to MT Ram Sale. I do not push my ewe lambs to grow fast but rather slow. They have been on pasture, hay with minimal grain, up to date on worming and ready to breed this fall.

LOT 320

Hollenbeck Land & Livestock - 20 Katahdin/Dorper Fall Lambs - Molt, MT

These Dorper/Katahdins were born last summer/fall. They have run with big bands of sheep all summer that have both been herded and with electric fence. These are a nice set of small framed hair sheep that will fit in an existing flock or a great starter flock. Hair sheep are in high demand, and a nice set of uniform ewes are hard to come by, don't miss out on this emerging market.

10TH ANNUAL MONTANA EWE SALE

LOT 321

Prairie Elk - 20 Targhee Lambs - Wolf Point, MT

These Ewe lambs were born in April. They are shed lambed, we average around 200% drop and manage for production. Ewe lambs are selected based on confirmation and mothering ability. The flock comes primarily from foundation of Skull Creek Targhees. Lambs have great feet and are thoroughly Vet checked. Herd has never had sheep ticks in 15 years. They have been Intensively grazed using electric fence. Our wool clip consistently runs 21 to 22 micron.

LOT 322

Prairie Elk - 20 Targhee Lambs - Wolf Point, MT

These Ewe lambs were born in April. They are shed lambed, we average around 200% drop and manage for production. Ewe lambs are selected based on confirmation and mothering ability. The flock comes primarily from foundation of Skull Creek Targhees. Lambs have great feet and are thoroughly Vet checked. Herd has never had sheep ticks in 15 years. They have been Intensively grazed using electric fence. Our wool clip consistently runs 21 to 22 micron.

LOT 323

Lazy 4X Livestock Co - 20 Merino/Targhee/Rambouillet Yearlings - Cohagen, MT

This is year we are excited to offer, what we feel, is a quality pen of yearling ewes. We lamb mid- April with all ewes being shed lambed. Then the sheep graze on native pastures until lambs are marketed in early August. We also winter graze with some supplement. Our flock delivered a 165% drop this spring while shearing 20.5micron and a 60% yield. Sires used are from Lehfeldt Land and Livestock and home raised Targhee Cross Rams.

LOT 324

Helle Livestock - 20 Rambouillet Yearlings - Dillon, MT

Commercial Rambouillet yearlings. These ewes are genetically backed by our breed leading NSIP rams. Expect 3.5 inch staple length and under 20 micron wool crop. Average lambing percentage of over 160% with good mothering instinct, easily shed lambed. These yearlings have been herded their whole life on crop residue and summer mountain range. Shorn June 10th. Some great ewes to add to or start your flock! Take delivery of these ewes at the ranch in Dillon in early October.

LOT 325

Hinnaland - 20 Targhee Yearlings - Circle, MT

Forty home raised yearling ewes are our consignment this year. They have spent the summer competing with grasshoppers on native grass. Their mothers are shed lambed and will follow their lambs into a jug. These sheep are mild mannered and easy to work with, will follow a feed pickup anywhere and know how to eat pellets. They were shorn May 2nd. The 2023 wool clip was 17.8 micron and 60.5% yield. Sires are fine woolled rams purchased at MWGA Ram Sales. Mothers of these sheep have all been home raised as we have not purchased a female sheep in over 30 years.

10TH ANNUAL MONTANA EWE SALE

LOT 326

Bieber Land, LLC - 20 Targhee Yearlings - Brockway, MT

Bieber Land is consigning sixty head of range ready yearling commercial Targhee ewes to the Tenth Annual Montana Ewe Sale. The dams of these yearlings have been shed lambed and selected for mothering ability as well as udder soundness and conformation. Ewes are retained for their ability to raise their lambs with no assistance while staying in good condition. The sires are all purebred Targhee rams with NSIP selected for high growth traits and high fleece traits. The rolling five-year core average for the flock is 20.5 micron. The ewes and lambs are run on Eastern Montana range after lambing and the lambs are weaned on grass. These yearling ewes were kept based upon conformation, build and their performance comparative to their birth type.

LOT 327

Justin King - 20 Targhee Yearlings - Hammond, MT

Consigning 40 Targhee yearling ewes that were raised on hard gumbo pasture with guard dogs in Southern Carter County. Ewes were shed lambed with low input. The flock's wool core averages 21 to 22 microns. Rams used on these ewes include Skull Creek Targhees and Diamond U Targhees.

LOT 328

Jones Ranch - 20 Rambouillet Yearlings - Conrad, MT

With a ranch history of 133 years of breeding, along with vigor, range raised, fed and bred here in Montana we offer 30 yearling ewes. We strive for always improving microns surpassing the expected. We also are focused on improving and perfecting weight gains, ribeye size and range hardiness, fertility, and milk production. Our goal is all about breeding quality. We focus on the whole picture not just one or two attributes. This is a really nice set of yearling ewes with micron range from 16-20.

LOT 329

Wynn & Jeff Tauck - 20 Targhee Yearlings - Hammond, MT

Our family has been raising Targhee sheep for four generations. Our ranch is located in Carter County in South-eastern Montana. These ewes are from our registered flock bred up from bucks bought at the Montana Ram Sale. Wool production is a main focus of our sheep program with consistently low microns and high yielding fleeces. Our wool core test included these yearling ewes as well as our aged ewes—20.8 micron. 59.6% yield and a comfort factor of 97.9%.

LOT 330

Bieber Land, LLC - 20 Targhee Yearlings - Brockway, MT

Bieber Land is consigning sixty head of range ready yearling commercial Targhee ewes to the Tenth Annual Montana Ewe Sale. The dams of these yearlings have been shed lambed and selected for mothering ability as well as udder soundness and conformation. Ewes are retained for their ability to raise their lambs with no assistance while staying in good condition. The sires are all purebred Targhee rams with NSIP selected for high growth traits and high fleece traits. The rolling five-year core average for the flock is 20.5 micron. The ewes and lambs are run on Eastern Montana range after lambing and the lambs are weaned on grass. These yearling ewes were kept based upon conformation, build and their performance comparative to their birth type.

10TH ANNUAL MONTANA EWE SALE

LOT 331

Hinnaland - 20 Targhee Yearlings - Circle, MT

Forty home raised yearling ewes are our consignment this year. They have spent the summer competing with grasshoppers on native grass. Their mothers are shed lambed and will follow their lambs into a jug. These sheep are mild mannered and easy to work with, will follow a feed pickup anywhere and know how to eat pellets. LOT 332

Helle Livestock - 20 Rambouillet Yearlings - Dillon, MT

Commercial Rambouillet yearlings. These ewes are genetically backed by our breed leading NSIP rams. Expect 3.5 inch staple length and under 20 micron wool crop. Average lambing percentage of over 160% with good mothering instinct, easily shed lambed. These yearlings have been herded their whole life on crop residue and summer mountain range. Shorn June 10th. Some great ewes to add to or start your flock! Take delivery of these ewes at the ranch in Dillon in early October.

LOT 333

Justin King - 20 Targhee Yearlings - Hammond, MT

Consigning 40 Targhee yearling ewes that were raised on hard gumbo pasture with guard dogs in Southern Carter County. Ewes were shed lambed with low input. The flock's wool core averages 21 to 22 microns. Rams used on these ewes include Skull Creek Targhees and Diamond U Targhees.

LOT 334

Blue Bell Sheep - 20 Targhee/Rambouillet Yearlings - Molt, MT

This set of Rambouillet/Targhee yearling ewes are just what a commercial sheep producer is looking for, in perfect condition to breed. They sheared 18 micron May 10th of this year. They are medium framed with just the right amount of flesh. These ewes have been herded and ran with guard dogs all summer. These ewes will be housed at the Miles City Livestock auction prior to sale for you to take a look. Will also have a truck there to help get them to where they need to go. Help yourselves to a great set of ewes.

LOT 335

Lehfeldt Rambouillets - 100 Rambouillet Yearlings - Lavina, MT

We are a Fifth-Generation, Polled, Registered Rambouillet sheep ranch located in Lavina, Montana. Shed lamb 2300 commercial ewes and 170 registered ewes in April with over 160% lamb crop NSIP and EBVs used in selection process for lambing rate, wool quality, and carcass quality for over the past 15 years. Ewes/lambs herded with livestock protection dogs on grass and leafy spurge during summer months All ewes have been herded in large bands on native grassland over the summer. Yearling Wool – 18.0 micron, 59.4% yield
A line – 20.0 micron, 59.2% yield

Offered in groups of 50 head lots A & B. Successful bidders will have the option of taking one or all lots at that price before bidding reopens.

10TH ANNUAL MONTANA EWE SALE

LOT 336

Blue Bell Sheep - 100 Targhee/Rambouillet Yearlings - Molt, MT

This set of Rambouillet/Targhee yearling ewes are just what a commercial sheep producer is looking for, in perfect condition to breed. They sheared 18 micron May 10th of this year. They are medium framed with just the right amount of flesh. These ewes have been herded and ran with guard dogs all summer. A CLOSER LOOK AT EBV's

EBVs quantify the genetic merit of a sheep for a particular trait. They express the expected deviation of performance of an animal for each trait. Each EBV consists of an age category and a measurement type. In the following example, if the ram has an EBV of 3.0 kg for weaning weight (WWT) he has the genetic potential to be 3 kg heavier at weaning compared to others in the breed and his lambs should be 3.0 pounds heavier at weaning when we convert to pounds and since each lamb inherits half its genetics from its sire. EBVs at the Montana Ram Sale available for –

Blackface Consignors are: Birth Weight (BWT), Weaning Weight (WWT), Post Weaning Weight (PWWT), Post Weaning Weight Fat (PFAT), Post Weaning Weight Eye Muscle Depth (PEMD), and the Carcass Plus Index.

Whiteface Consignors are: Number of Lambs Born (NLB%), Maternal Weaning Weight (Milk Wt.), Yearling Eye Muscle Depth (YEEMD), Post Weaning Weight (PWWT), Yearling Weight (YWT), Yearling Fleece Weight (YFW), Yearling Fiber Diameter (YFD), Yearling Staple Length (YSL) and the US Western Range Index (Range Index).

Blackface and Whiteface Consignor EBV's should not be compared against each other as they are breed specific!

Birth Weight (BWT) estimates direct genetic effects on weight at birth. Positive selection on Birth Weight EBV is anticipated to increase birth weight and have correlated positive effects on early lamb survival, especially in twins and triplets. Negative selection on Birth Weight EBV is anticipated to reduce birth weight and lambing difficulty associated with oversized lambs, especially in singles.

Weaning Weight (WWT) provides an estimate of preweaning growth potential and will likely receive positive selection emphasis in most flocks. In extensively managed flocks with weaning at 90 to 150 days, the Weaning Weight EBV is commonly estimated from preweaning weights taken at 45 to 90 days of age.

Postweaning Weight (PWWT) combines information on preweaning and postweaning growth to predict genetic merit for postweaning weight at 120 days. Positive selection on Postweaning Weight EBV is expected to favor rapid growth to typical market ages.

Post Weaning Weight Fat (PFAT) is an indicator of genetic differences in carcass fatness between the 12th and 13th ribs. It is derived from ultrasonic measurements of fat depth in live animals and adjusted to standard postweaning weight of 110 lb (55 kg) for Terminal and Maternal Wool breeds and a standard yearling weight of 187 lb (85 kg) for Western Range breeds. Animals with negative Fat Depth EBV are expected to produce leaner progeny with lower, more desirable Yield Grades and are generally desirable.

Yearling Weight (YWT) estimates growth potential to 12 months of age. Animals with high Yearling Weight EBV exhibit sustained postweaning growth, but ewe lambs with high Yearling Weight EBV are anticipated to have heavier adult body weights and greater maintenance requirements.

Yearling Eye Muscle Depth (YEEMD) is an indicator of genetic differences in muscling. It is derived from ultrasonic measurements of loin muscle depth between the 12th and 13th ribs in live animals and adjusted to standard postweaning weight of 110 lb (55 kg) for Terminal and Maternal Wool breeds and a standard yearling weight of 187 lb (85 kg) for Western Range breeds. Animals with positive Loin Eye Muscle Depth EBV are expected to produce offspring with larger loin eyes and are generally desirable. *Applies to Post Weaning Weight Eye Muscle Depth (PEMD) as well.

Number of Lambs Born (NLB %) expresses the genetic potential for prolificacy and is reported in a percentage (%). If a ram has 26% NLB EBV, he should sire daughters that will have 26% more lambs than the average or if he sires 100 daughters, they will drop 26 more lambs compared to average.

Maternal Weaning Weight (Milk Wt.) estimates genetic merit for mothering ability and mainly reflects differences in ewe milk production. Selecting for high MWWT is expected to increase milk production and overall mothering ability of ewes which will reflect in increased pounds of lamb weaned.

Yearling Fleece Weight (YFW) is based on greasy fleece weights and estimate the animal's genetic potential for wool production. Fleece weights are stored and analyzed in kilograms. However, because of the limited range in resulting EBV and potentially large effects of environment, management, and sex on yearling fleece weight, the GFW EBV is reported as a percentage of the mean fleece weight. A GFW EBV of +10 thus indicates that the animal is expected to produce fleeces that are 10% heavier than average.

Yearling Fiber Diameter (YFD) estimates genetic merit for fleece quality. Animals with finer, more desirable fleeces have negative fiber diameter EBV, so negative EBV are favored for this trait.

Yearling Staple Length (YSL) estimates genetic potential for length of the wool fiber. Positive selection emphasis on Staple length EBV is recommended in flocks that receive premiums for long-staple fleeces or have experienced discounts for fleeces with excessively short staples

Carcass Plus Index was developed in Australia to improve carcass value in Australian markets. Carcass Plus EBV are calculated as:

$$\text{Carcass Plus Index} = 100 + (2.33 \times \text{WWT EBV} + 3.50 \times \text{PWWT EBV} + 11.40 \times \text{PEMD EBV} - 4.07 \times \text{PFAT EBV})$$

Even though developed for Australian markets, Carcass Plus Index scores provide a reasonable assessment of value for Terminal Sire types in the USA.

US Western Range Index (Range Index) was developed by NSIP to improve profitability in Targhee range flocks and is generally applicable to extensively managed Western range flocks with positive emphasis on both lamb and wool production. EBV for the Western Range Index are estimated from Postweaning Weight (PWWT), Maternal Weaning Weight (MWWT), Yearling Weight (YWT), Yearling Fleece Weight (YGFW), Yearling Fiber Diameter (YFD), and Number of Lambs Born (NLB) EBV as:

$$\text{US Range Index} = 100 + (2.20 \times \text{PWWT EBV} + 0.57 \times \text{MWWT EBV} - 0.57 \times \text{YWT EBV} + 0.14 \times \text{YGFW EBV} - 0.47 \times \text{YFD EBV} + 36 \times \text{NLB EBV})$$

This index places major positive weight on early growth and ewe prolificacy and modest positive weight on increasing ewe maternal ability, increasing fleece weight, and reducing fiber diameter. Negative emphasis on yearling weight EBV is designed to limit increases in adult ewe weight but, because of the large positive correlation between Weaning Weight and Yearling Weight EBV, is not expected to actually reduce yearling weights. The Number of Lambs Born EBV is used in preference to the Number of Lambs Weaned EBV because of potential bias in Number of Lambs Weaned EBV from predation in Western range flocks.

98TH ANNUAL MONTANA RAM SALE

Thursday, September 14, 2023 • 12PM

Agri-Sports Building • Eastern Montana Fairgrounds • Miles City, MT

We're glad you could join us in Miles City (or online!) for the Montana Ram and Ewe Sales this year. Our MWGA member-consignors have been working hard to get all their data collected, sorting through their rams and making plans for sale week all year long. They already have dozens of hours into collecting data and caring for their 2022 consignments.

Rams and ewes arrive on the grounds Monday and Tuesday. Each ram and ewe sold on-site is individually inspected by the sale veterinarian. After the sheep are settled in, the fun begins. Read about all the happenings Wednesday on the Ewe Sale page on page 13!

On Thursday morning, the coffee and donuts will greet buyers as they come to look at the ram offering. 285 bucks will be offered at the 98th Annual Montana Ram Sale. This sale provides data including: scrapie codon, NSIP data, production records, ribeye scans, wool micron, and more! Visit with consignors to get your questions answered and find a ram that fits your flock. There are several breeds available from our 24 consignors.

Blackface bucks will be offered in single pens. Whiteface breed rams will be offered in single lots, and pens of two. Remember, the bidding is twice the money on the pens of two. That means if you bid \$1,000, you're in on the pen for \$2,000 total. **You will see the double lots listed as A and B in the catalog. For example, Lot 126A and Lot 126B are a pen of 2. They will sell together.**

A lamb lunch will be served from 11AM (\$10/plate) until the food is gone. American Leg-of-lamb sourced from the local community will be the spotlight of the meal-with sides prepared by Reynolds market, and beverages from Blue Rock.

The sale will kick-off at noon sharp. If you're unable to join in-person, register to watch and bid online for both sales at FrontierLiveSale.com. The sales will be streamed live. You can also call in your bid on the phone. Please line-up transportation if you are planning to buy online.

The Ram and Ewe sale catalogs will be LIVE online, September 1. Find the link at mtsheel.org, or Frontier Productions website, <https://frontierlivesale.com/>.

Let's have a great sale! Thank you for being here!

PURCHASED BUCKS MAY BE LOADED OUT DURING THE RAM SALE, AFTER THE SALE, OR FRIDAY MORNING BEFORE 10 AM. PLEASE SEE SALE TERMS ON PAGE 8.
